SUMMARY

Full-stack developer and Computer Systems Engineer. I build the Angular front end of a sports analytics platform used by professional clubs and, in parallel, React, Vue and Laravel apps for clients of an agency in Mérida, Mexico.

EXPERIENCE

Front-End Developer · SoloPerformance (Spain), remote — Apr 2025 – Present

- Build the Angular front end of a platform for coaching staff used by professional sports clubs.
- Built complete modules: feed, dashboard, bulk actions, presentation mode, and player and injury analytics with charts.
- Develop components for an internal reusable library documented in Storybook, within a large, complex codebase.

Full-Stack Developer · Nativo Digital, Mérida — Aug 2025 – Present

- SumoShop: building a home-delivery app with Vue and Laravel.
- Mapisa del Sureste: internal system to organize orders, loads and delivery drivers, with React, Django and MongoDB.
- TopTerrenos: built the land-sales website with React and Laravel.
- WordPress websites for local businesses through a Yucatán state government support program (SETY).

Full-Stack Developer · Freelance — 2026

- Pizzazi: digital menu with an admin panel to update prices and generate QR-code coupons sent to customers over WhatsApp.
- Restaurant point-of-sale system with React, Node.js and Express: cash closing, delivery drivers and users, designed for multiple branches and built for a local pizzeria.

Web Developer · SoftMLX (social service and projects) — Sep 2023 – Jun 2025

- Teeth Care: web version of a dental-clinic management app with Angular, Firebase Authentication and a Flask (Python) back end on Firestore.
- School-management system for a boarding school in Dzitbalché with Angular; deployed on Google App Engine with a custom domain.
- D-Agnostic: front end of a platform for surveys, exams and administrative tracking with Angular.

ACADEMIC PROJECT

Geriatric care system · Back end — 2025

NestJS API with role-based access, real-time updates over WebSockets and AI-assisted diagnosis by integrating language models through OpenRouter.

SKILLS

Languages	TypeScript, JavaScript, Python, PHP, HTML5, CSS3, Sass
Front end	Angular, React, Vue, Next.js, Storybook, Angular Material, Tailwind CSS, Bootstrap
Back end	Node.js, NestJS, Express, Laravel, Django, Flask, WordPress, REST APIs, WebSockets
Databases	MongoDB, Firestore
Cloud & tools	Google Cloud (App Engine), Firebase, Git, Docker
AI	LLM integration with OpenRouter
Spoken languages	Spanish (native), English (B1)

EDUCATION

B.Eng. in Computer Systems Engineering · Software Development specialization — 2021 – 2026

Instituto Tecnológico Superior de Calkiní (ITESCAM), Mexico · Graduated May 2026

Programming Technician · Technical high school diploma — 2018 – 2021

CECyTE Yucatán, Maxcanú campus
